## Work Experience

### Frontend Engineer

Feb 2024 – Present

*Prodevs | Lagos, Nigeria*

Frontend engineer building and maintaining responsive web applications with React, TypeScript, Laravel, Tailwind CSS and more.

- Led frontend development of the company's corporate website, managing architecture and implementation end-to-end
- Developed key frontend features for Talent Apply, an AI-powered job search platform featuring automated matching, application tracking, and resume analysis
- Deliver scalable, user-focused solutions through collaboration with cross-functional teams using modern web technologies

### Frontend Engineer

Aug 2022 - Present

*Techies Africa | Lagos, Nigeria*

Part of a digital agency team focused on developing web solutions while mentoring emerging tech talent.

- Develop client projects and digital solutions as part of the agency's service offerings
- Mentor young talents entering the tech industry, providing guidance on frontend development skills and career development

### Frontend Engineer

Sep 2023 - Jun 2025

*Jive Technologies | Lagos, Nigeria*

Built and maintained websites for the company and school clients using React, TypeScript, Next.js and more.

- Built and developed the company's corporate website showcasing their educational technology services

- Created custom websites for multiple school clients as part of the company's digitization initiatives

## Projects

### Prodevs

A modern, responsive website for ProDevs, a talent marketplace connecting global companies with vetted African software developers and tech professionals. The site showcases multiple hiring models (freelance, full-time, managed teams), features service pages for different talent categories, client success stories, and streamlined user flows. Built with a focus on conversion optimization and performance.

### Talent Apply

AI-powered job search platform featuring automated matching, application tracking, resume analysis, and interview preparation tools with personalized insights and AI-driven recommendations for optimized career management.

- CV/Resume Analyzer
- Interview Prep
- Cover letter Generator
- LinkedIn Review

### KHNL Management System

Comprehensive web application designed for KHNL travel and tour agency to manage client bookings, trip requests, financial operations, and customer inquiries. The platform streamlines business operations by providing centralized tools for tracking transactions, managing client beneficiaries, and overseeing corporate personnel.

- Client Management System
- Finance Tracker
- Role Based Access Control

## Core Skills

Typescript, React, Next js, Astro, Laravel, Tailwind css, SEO, Accessibility (WCAG/ARIA)
